Bio

As an accomplished cinematographer and producer with a national Emmy nomination I am adept at producing, lighting and operating for a variety of visual styles, cinematic and story formats; ranging from 4k documentary, reality and commercial content to full frame scripted features. My career became rooted in still photography in the late 90's working with stock image companies such as Corbis and Getty Images, delivering imagery with an impact.

Since then, I've made the segue to cinematographer and in addition to a BFA in *Film Production & Cinematography* I have been privileged enough to work for clients such as Discovery, History Channel, NBC, ABC, National Geographic, General Electric, BBC, Disney, and many others. But most of all I love to tell stories and work creatively with others.

Education

BFA *Film Production & Cinematography*, Chapman University - 2001
